

TWENTIETH  

ANNUAL REPORT *of the*

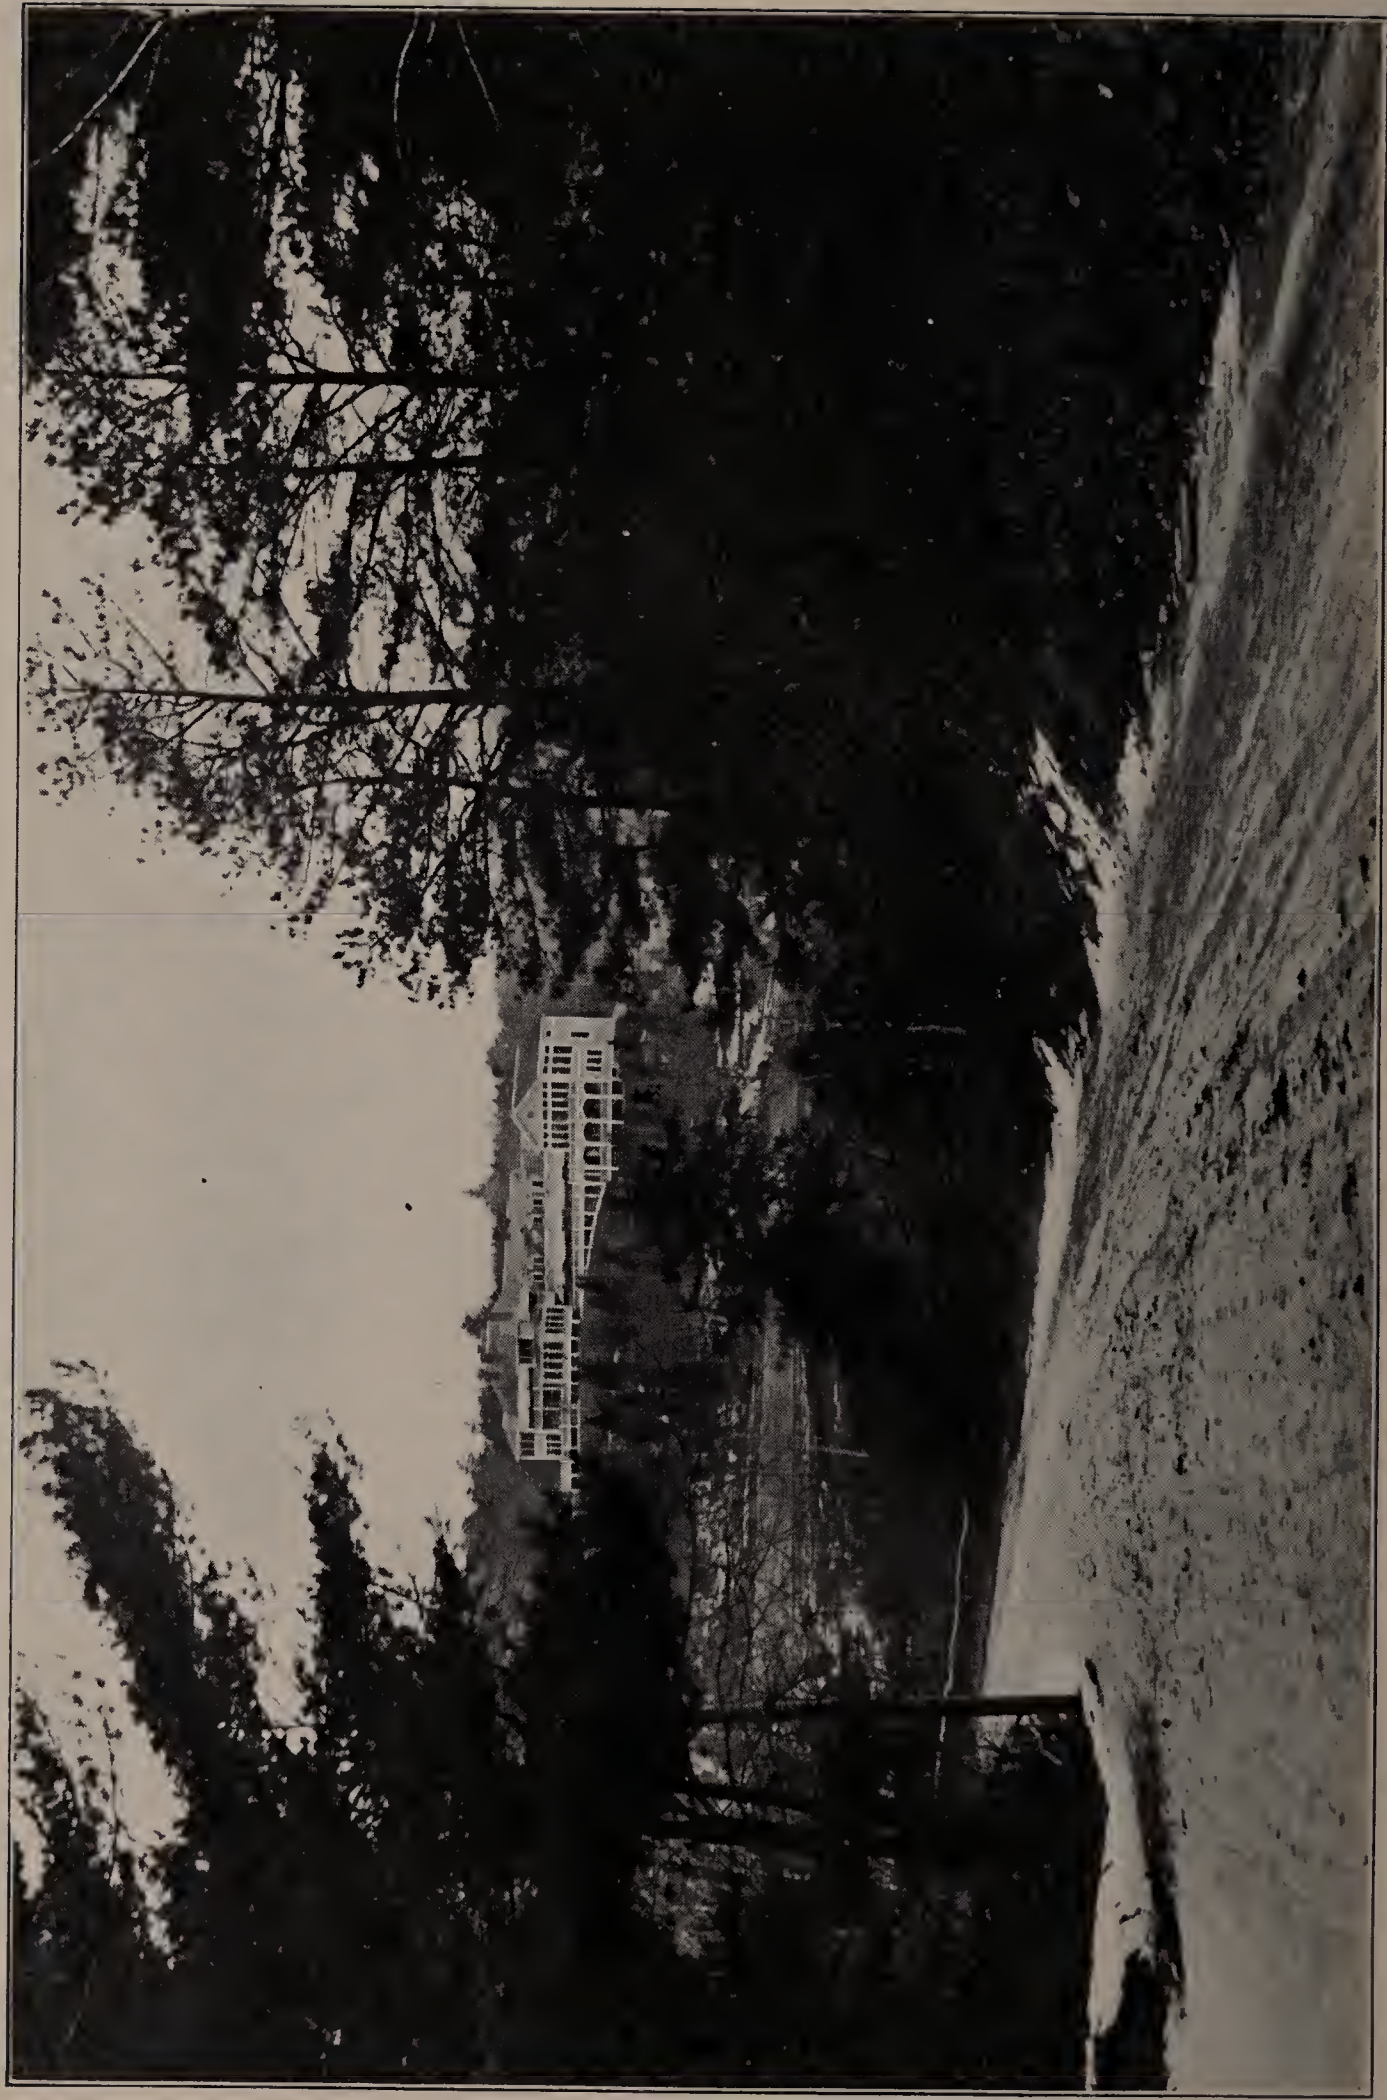

# SHARON SANATORIUM

SHARON, MASSACHUSETTS

THE SHARON SANATORIUM FROM THE SOUTH-EAST.

TWENTIETH ANNUAL REPORT

OF THE

Sharon Sanatorium

For Pulmonary Diseases

SHARON, MASS.

December, 1910

*Incorporated March, 1891*

BOSTON

GEO. H. ELLIS CO., PRINTERS, 272 CONGRESS STREET

1911

## OBJECT OF THE SHARON SANATORIUM.

---

TO supply a suitable institution for the treatment of *incipient* pulmonary disease arising in women who are unable, for pecuniary and other reasons, to seek distant health resorts. Only patients who are of limited means are received, and no far advanced cases are admitted. Price of board \$10 per week exclusive of laundry.

The services of the Medical Director and medicines are given free of charge.

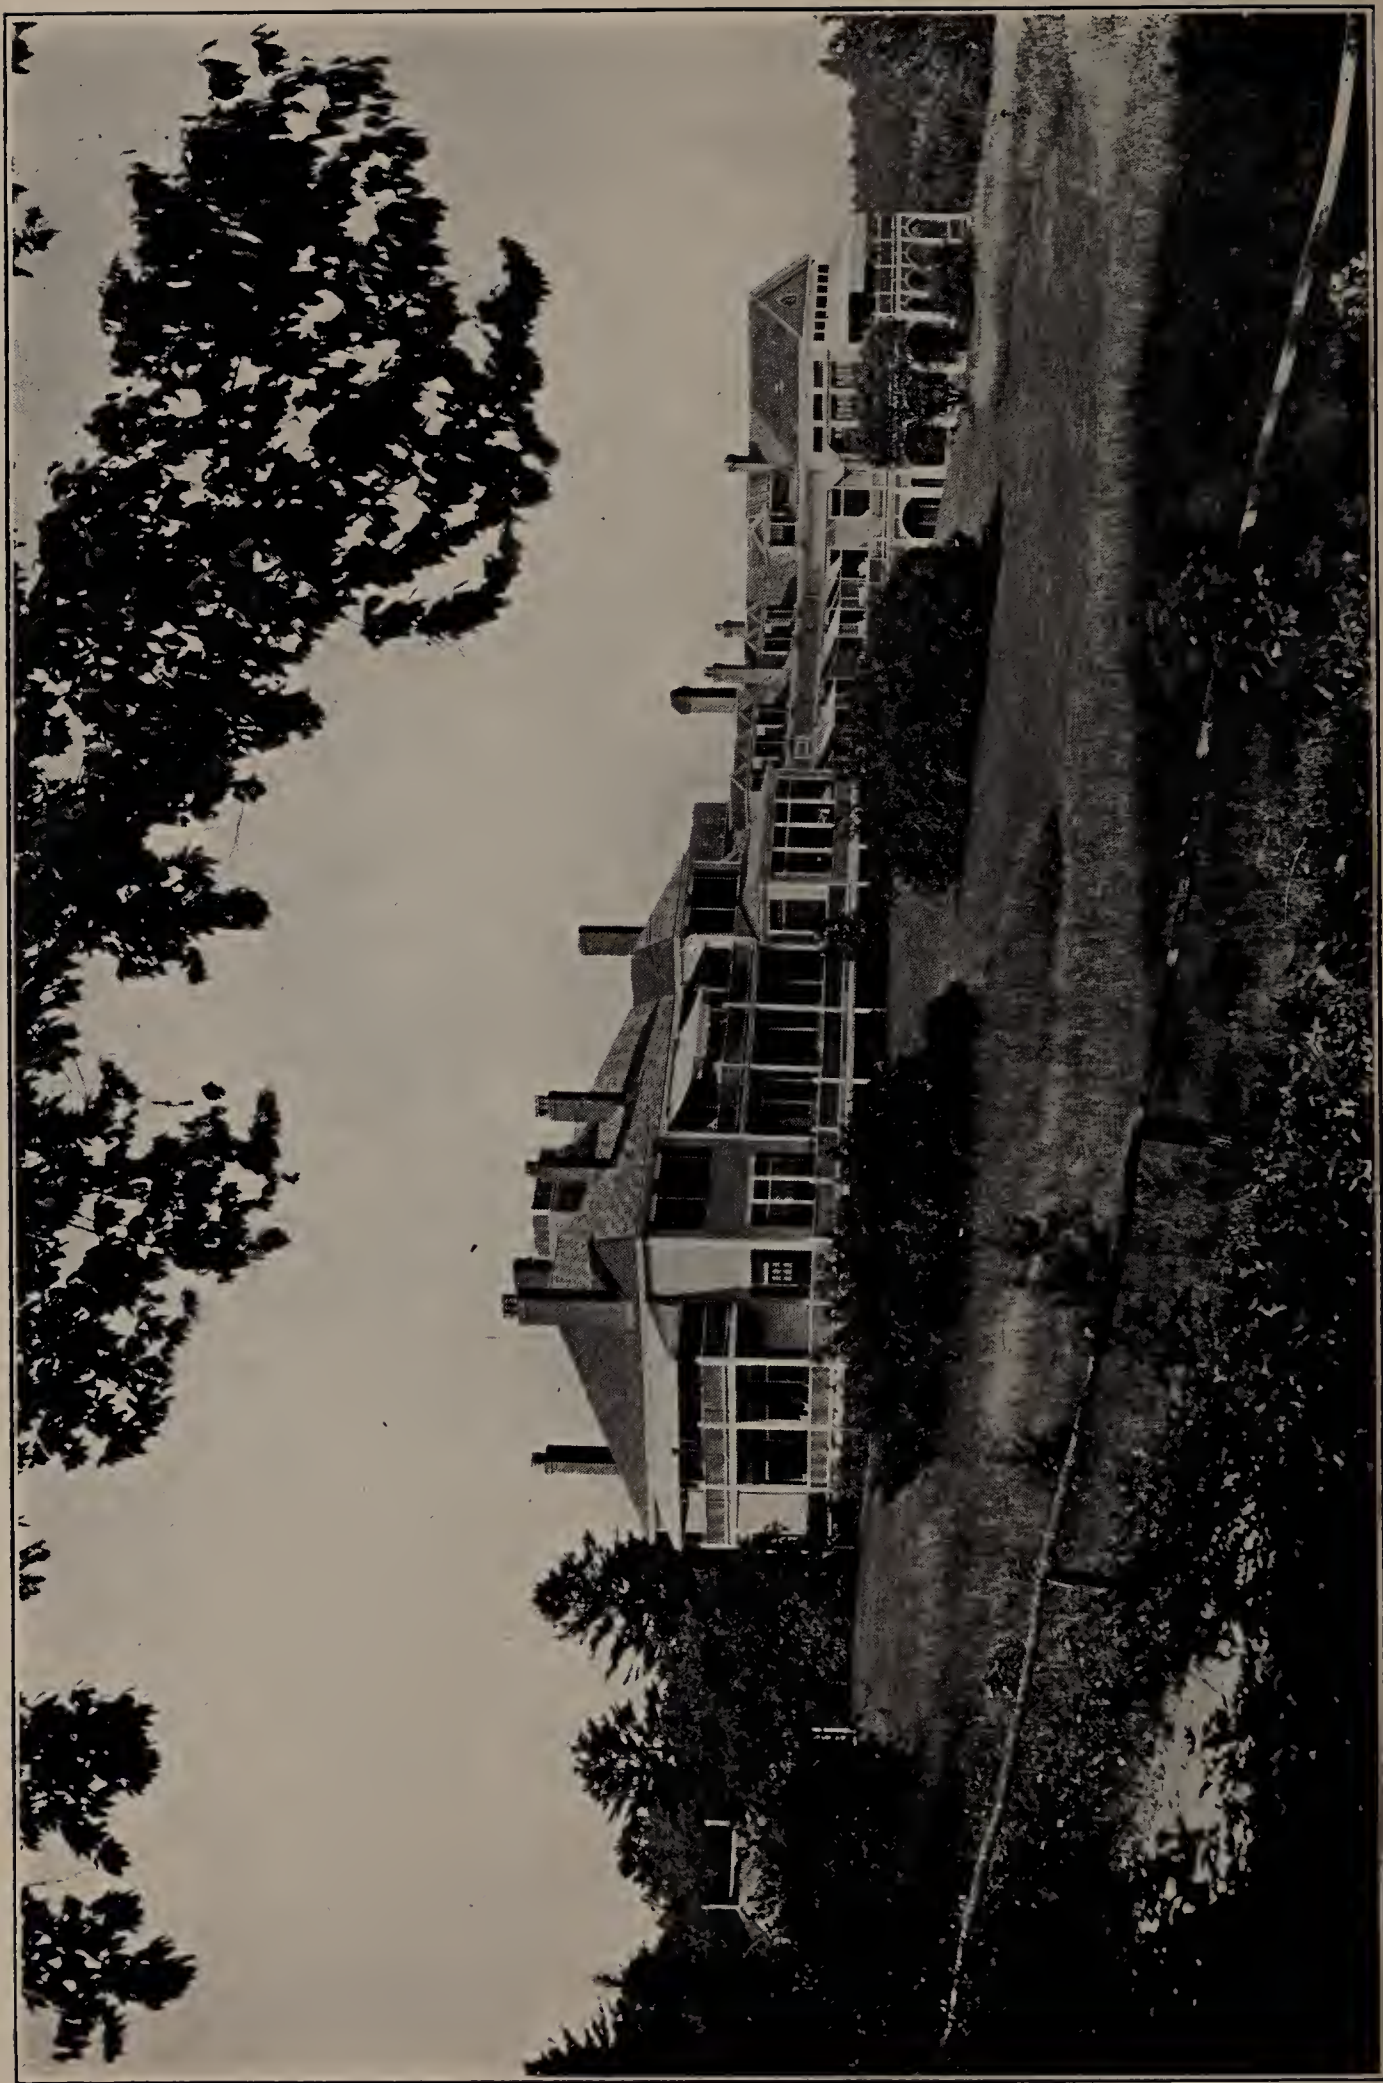

Visiting hours { from April 1 to November 1, 3 to 5 P.M.;  
                          { from November 1 to April 1, 1 to 3 P.M.

Visitors are kindly requested to adhere to these hours.

Applications must be made to the Superintendent, Miss Alice R. Hodges, Sharon, Mass.

SHARON SANATORIUM FROM THE SOUTH-WEST.

## OFFICERS OF THE SHARON SANATORIUM.

---

### Board of Directors.

WILLIAM T. SEDGWICK, Sc.D., *President.*

N. H. STONE, *Treasurer,*  
614 Sears Building, Boston.

Mrs. CHARLES A. PORTER, *Secretary.*

AUGUSTUS HEMENWAY.

Rev. EDMUND F. MERRIAM.

Mrs. HENRY P. KING.

Mrs. WM. T. SEDGWICK.

VINCENT Y. BOWDITCH, M.D.

L. VERNON BRIGGS, M.D.

---

### Medical Director.

VINCENT Y. BOWDITCH, M.D.

---

### Resident Physician.

WALTER A. GRIFFIN, M.D.

---

### Superintendent and Matron.

Miss ALICE R. HODGES.

AUXILIARY COMMITTEE OF SHARON  
SANATORIUM.

---

Mrs. E. F. BOWDITCH, *President.*   Mrs. WALTER C. BAILEY,  
*Secretary.*  
Miss M. A. YARDLEY, *Treasurer.*   Mrs. GEORGE H. WINDELER.  
Mrs. ROBERT M. MORSE.   Miss GRACE S. PARKER.  
Mr. HERBERT JAQUES.

THE SUN PARLOR.

THE DINING-ROOM.

## DIRECTORS' REPORT.

In February of the coming year (1911) the Sharon Sanatorium begins the twentieth year of its existence. Although a review of its work has been made in a previous Report, it seems fitting that at this anniversary a fuller statement should again be made of what has been accomplished since the doors were first opened to receive patients, on February 9, 1891.

Begun as an experiment to see what could be done for people who were showing symptoms of incipient pulmonary disease, the Sanatorium has proved conclusively that a fundamental idea which was regarded twenty years ago with scepticism, to say the least, is no longer a matter of doubt, but an established fact; viz., that a large percentage of patients with incipient disease can be restored to health without resorting to the sterner necessity of sending them far from their homes.

In reviewing the results of the work at Sharon, we can now number by hundreds the women who in former years were under treatment with unmistakable symptoms of pulmonary disease and who are now well and strong. This is the best testimony we could have of

what has been accomplished and a result which twenty years ago would have been deemed impossible of achievement. It should not be forgotten that this was the first institution of its kind in New England, or that for several years it stood as the sole example of the principle laid down above. In the last ten years, however, there has been a remarkable increase in the number of similar institutions throughout the United States; and in Massachusetts, in addition to the establishment of the Rutland Sanatorium in 1898, three other large State sanatoria have been founded within two years.

It might, therefore, be readily supposed that in consequence of this increase of accommodation in the State for tuberculous patients there is less need of small private institutions like that at Sharon for people of limited means. That the contrary is the truth, however, can be easily shown. Increasing knowledge of tuberculosis and the methods of combating it have swelled the ranks of those who wish to adopt sanatorium treatment, and therefore, along with the establishment of State sanatoria for the poorest people, there has been an increase in the demand for accommodations at Sharon for the more refined class, who, although restricted in means, yet need the comfort and privacy of smaller institutions when obliged to leave their homes. *It is for this class that the Sharon Sanatorium is especially intended.*

A word should be said in regard to the increase of board to ten dollars a week, which the Directors during the past year have been compelled to make. This action was due to the fact that the greatly increased cost of living in the

past few years has nearly doubled the annual deficit, thus throwing additional burdens upon those who were responsible for the institution. It changes somewhat, but does not lessen the charitable nature of the work, which aids many worthy people who can afford by strict economy to pay the present price of board, but who cannot go to the more expensive sanatoria. In many cases, moreover, the patient's board is paid by philanthropic people. Even with this assistance, however, it is impossible to meet the necessary expenses without additional help for keeping the Sanatorium up to the proper standard of efficiency.

The numerous demands made upon the public in recent years for aid in the various movements for the suppression of tuberculosis has probably made it more difficult to obtain the generous support which the Sanatorium has had for so many years. Many of the earlier subscribers have died, with consequent diminution in the amount annually given to the work. The Directors believe, however, that by placing the facts before the public, other benefactors will take the place of those now gone. They are glad to state that in the twenty years of existence the institution has never been in debt; but funds are constantly needed, not only to continue the present work, but to improve it and to make necessary repairs.

During the past year the Sanatorium has extended its usefulness by receiving visits from classes of students from the Harvard Medical School at stated intervals. A series of demonstrations has been given by the Resident

Physician and Medical Director, with the co-operation of Dr. Edwin A. Locke, of the Harvard Medical School. Although no personal examinations of the patients are made, practical instruction is given to the students in methods of treatment, thereby greatly increasing the value of the Sanatorium as a school for hygiene in the community.

The following extract from a letter written by a patient who left the Sanatorium twelve years ago is inserted as a specimen of what is frequently received from those who have been helped in former years:—

“The new year finds me stronger than last year, in spite of the fact that I was so well then. I have not had a sick day since I last wrote you. Have worked at the State House steadily with only a month’s vacation. During the warm weather I came out to Haverhill every night, going to Boston again in the early morning. I am sure none of your former patients has a better record than that.

In October I attended the annual reception at the Sanatorium. Miss Hodges made it very pleasant for every one. At the present time I attend an evening school two evenings a week, besides doing my day’s work at the State House. I tell you this merely that you may understand how well I am.

I shall never cease to think of the Sanatorium with affection and gratitude. I am quite sure that I should not have received such tender care and consideration at any other institution of the kind.”

To summarize, then, what the Sharon Sanatorium has stood for in the last twenty years:—

First, it has proved that tubercular disease, if taken early in its course, can be arrested by comparatively simple means near at home in a much greater number of cases than was ever thought possible before its foundation.

Second, it has shown that even in the cases which are too far advanced to hope for permanent arrest of disease the patients have often become wage-earners again for a longer or shorter space of time, and have, moreover, acted as missionaries among their families and friends.

Third, scientific work has been done in the use of whatever methods have been thought to give promise of aid in combating the disease, close and thorough observation having been made possible on account of the comparatively small number of patients under supervision.

Fourth, instruction has been given to medical students to enable them to treat their future tuberculous patients with intelligence.

In considering these results, the Directors feel that the Sharon Sanatorium has more than justified its existence in the last twenty years, and they ask for the generous co-operation of the public in their work.

Our thanks are again offered to the Auxiliary Committee, whose continued and efficient efforts have added ma-

terially to the treasury, to the press of Boston and Sharon, which has been of great assistance on various occasions, and to other friends of the Sanatorium who have aided us in various ways.

THE DIRECTORS.

OPEN-AIR PAVILION.

BALCONY FOR SLEEPING OUT OF DOORS.

MEDICAL REPORT.

Full capacity of the Sanatorium . . . . .	23
Number of cases admitted since Dec. 1, 1909 . . . . .	45
Number of cases discharged during year . . . . .	44

During this year the average length of stay of patients has been greater. This is accounted for partly by the fact that more individuals have been treated with tuberculin, since it has been thought best to carry out the most approved treatment thoroughly rather than to cater to a larger number of cases, and this treatment frequently necessitates a longer stay. Further, more patients were found to have merely suspected tuberculosis (3 this year compared with 10 last year), and, therefore, a larger percentage had to remain longer for treatment.

One case died of disease of the kidneys shortly after admission. Two others stayed less than a month. In addition there was one case which showed no disease of the lung, but who had tuberculosis of the bones. This leaves 37 cases to be considered in detail in this report.

A tabular view follows, prepared in accordance with the suggestion of the National Association for the Study and Prevention of Tuberculosis, showing the condition of the patients proved to have pulmonary tuberculosis. From this it will be seen that there were:—

Apparently cured . . . . .	19=51%
Arrested . . . . .	10=29%
Improved . . . . .	7=18%
Not improved . . . . .	1= 2%

1 surgical case improved.

The number of patients who had tubercle bacilli in their sputa was . . . . .	19
The number of patients who had a positive tuberculin reaction was . . . . .	16
The number of patients in whom the physical signs were considered sufficient for diagnosis (566, 584, 606) was . . .	2
	<hr/> 37

The number of patients who had hemoptysis before entrance or during stay was . . . . .	17
--	----

Average stay of all cases . . . . .	6.2 months
Longest stay of any case . . . . .	18.5 months
Shortest stay of any case . . . . .	1 month
Average stay of apparently cured cases . . . . .	4.9 months
Average stay of arrested cases . . . . .	9.7 months
Average stay of improved cases . . . . .	4.7 months
Average gain in weight of all cases . . . . .	11 pounds
Number of cases who lost weight . . . . .	2
Average gain in weight of apparently cured cases . . . . .	12.9 pounds
Average gain in weight of arrested cases . . . . .	10 pounds
Average age of all cases . . . . .	27

Favorable reports are still received from the majority of the patients who were formerly in the Sanatorium and discharged as "arrested cases," this term having been applied according to the old nomenclature to all cases in which cough, sputa, fever, etc., had disappeared and in which there was every appearance of a return to health. Some of these patients left Sharon nearly nineteen years ago, and have been well ever since, leading active lives.

We are indebted to Dr. Walter C. Bailey for occasional assistance during the year.

We add our earnest appeal to that of the Directors for financial aid in supporting and increasing the work of the Sanatorium.

VINCENT Y. BOWDITCH, M.D.,  
*Medical Director.*

WALTER A. GRIFFIN, M.D.,  
*Resident Physician.*

TOTAL . .					31.80	202	55	71	93

No record has been made of the direction or velocity of the wind, but in general all west winds are fair and east winds bring foul weather. Sudden changes are frequent, but the harshness of the east wind is not felt so keenly as in Boston because of the intervention of the Blue Hill of Milton. The Sanatorium is so well protected by woods that there is seldom any hardship to patients from winter winds.

WALTER A. GRIFFIN.
